Natural cork stoppers for still wines

Standard UNE 56921 (Spanish Association of Standardization) standard that specifies requirements for corks (www.aenor.es)

CONDITIONS FOR USE

- **1.** Before using the stoppers check the storage conditions: Humidity: 50 - 70% and temperature 15 - 25 ° C
- 2. Do not wash nor wet the stoppers
- **3.** Check the dimensions of the inside of the bottle neck
- **4.** Prevent the inside of the bottle neck from becoming wet. Avoid any vibrations on the bottling line
- **5.** Compress the stoppers maximum to 33%. Prevent the formation of creases and nicks
- **6.** Adjust the corking machine so that the stopper is leveled with the mouth of the bottle
- 7. Cork the bottles ensuring the verticality of the stoppers
- **8.** Ensure that filling levels are observed according to the nominal capacity of the bottles
- 9. Do not fit the capsule if the stopper is moist
- **10.** Keep the bottles vertical for as long as possible
